

Arkansas Traffic Rules for Cyclists

Arkansas law does not specifically define a bicycle as a vehicle. In fact, the definition of "vehicle" appears in a section of the Arkansas Code, Annotated titled "Motor Vehicular Traffic" (Title 27, Subtitle 4), so bicycles aren't included in the definitions. A.C.A. § 27-49-111 contains the language from the Uniform Vehicle Code which reads, "*Every person riding a bicycle or an animal, or driving any animal drawing a vehicle upon a highway, shall have all the rights and all of the duties applicable to the driver of a vehicle, except those provisions of this act which by their nature can have no applicability*" so as to include cyclists as legitimate and rightful users of the public streets and highways.

The specific statutes pertaining to bicycles are found in the Arkansas Code of 1987, Annotated, ("A.C.A.") Title 27, chapters 49 through 111.

Cyclists may use any public road, street, or highway in Arkansas with the exception of the freeways and other controlled-access highways. You may ride your bicycle on the sidewalks in Arkansas, except in specific cities which have enacted local ordinances that prohibit riding on the sidewalks in the business districts (Little Rock, North Little Rock, Hot Springs, and Maumelle prohibit, directly or indirectly (NLR) cyclists from riding on the sidewalks. LR, Hot Springs, Conway, Maumelle, Fayetteville, and Fort Smith directly prohibit riding on the sidewalks in the business district, NLR indirectly prohibits bikes from all city sidewalks.)

Riding on the streets and public roads in Arkansas generally falls into six general principles in order to comply with state and local law:

- 1) Drive on the right side of the roadway; never on the left, and never on the sidewalk;**
- 2) Obey all traffic signals and traffic control devices;**
- 3) When you reach a more important or larger road than you are on, yield to crossing traffic;**
- 4) When you intend to change lanes or move laterally on the roadway, yield to traffic in the new lane or line of travel;**
- 5) When approaching an intersection, position yourself with respect to the direction of your destination; and**
- 6) Between intersections, position yourself according to your speed relative to other traffic.**

Bicyclists are required to signal like other vehicles pursuant to A.C.A. § 27-51-403, but not continuously if they need both hands for safety (A.C.A. § 27-49-111).

When riding at night, Arkansas law (A.C.A. § 27-36-220) requires that you have a white headlight on the front of your bike, and a red tail light on the rear – both visible from at least 500 feet away. You may substitute a red reflector on the rear provided that it is still visible from at least 500 feet away when illuminated. The white and red reflectors that come on your bike from the sporting goods store or bike shop are insufficient; state law requires that you have active lighting systems when riding at night (reflectors are passive.)

Arkansas does not require either children or adults to wear a bicycle helmet when riding.

Little Rock and Fayetteville city ordinances additionally require that a bicycle be equipped with a bell or other device for warning pedestrians, and that it have a brake capable of making the braked wheel skid on dry, level pavement.

Additional information (aimed exclusively at motorists) is found in the Arkansas Driver's License Study Guide (http://www.arkansas.gov/dfa/driver_services/ds_documents.html), not all of which is covered under Title 27 of the Arkansas Code of 1987.

The League’s Rules of the Road.

Follow the law – your safety and the image of bicyclists depend on it. You have the same rights and responsibilities as drivers. Stop at red lights and stop signs. Ride with traffic and use the rightmost lane that heads in the direction you are going.

Be predictable – make sure drivers and other cyclists know what you are doing. Ride in a straight line and don’t swerve between parked cars. Signal your turns, and check behind you before turning or changing lanes.

Be visible – ride where drivers can see you. Use a front white light and red rear light and reflectors when it is dark or dusk; wear visible clothing at all times. Make eye contact with drivers. Don’t ride on the sidewalk.

Think ahead – anticipate what drivers, pedestrians, and other cyclists are going to do next. Watch for turning vehicles and for opening car doors; ride outside the door zone. Look out for debris, potholes, and utility covers in the road.

Ride Ready. Check you have air in your tires, your brakes are working, and your chain runs smoothly. Carry repair and emergency supplies appropriate to the length of your ride. Wear a helmet.

(b) (1) The maximum speed limits set forth in subsection (c) of this section shall not apply to controlled-access highways.

(2) (A) Upon an engineering and traffic investigation, the State Highway Commission shall determine the maximum permissible speeds on controlled-access highways which shall be effective when appropriate signs giving notice are erected along the highway.

(B) The commission shall fix the maximum permissible speed of trucks with one and one-half (1½) ton capacity or more at ten (10) miles per hour below the maximum permissible speed for automobiles.

(c) On all facilities other than controlled-access highways, except when a special hazard exists that requires lower speed for compliance with subsection (a) of this section, the limits specified in this section or established as authorized shall be maximum lawful speeds, and no person shall drive a vehicle on a highway at a speed in excess of the following limits:

(1) Thirty (30) miles per hour in any urban district;

27-51-208. Minimum speed regulation.

(a) No person shall drive a motor vehicle at such a slow speed as to impede the normal and reasonable movement of traffic except when reduced speed is necessary for safe operation or in compliance with the law.

(b) Whenever the State Highway Commission or local authorities, within their respective jurisdictions, on the basis of an engineering and traffic investigation, determine that slow speeds on any part of a highway consistently impede the normal and reasonable movement of traffic, the commission or the local authority may determine and declare a minimum speed limit below which no person shall

drive a vehicle except when necessary for safe operation or in compliance with the law.

27-51-301. Vehicles to be driven on right side of roadway - Exceptions.

Whenever any roadway has been divided into two (2) or more clearly marked lanes for traffic, the following rules in addition to all others consistent with this subchapter shall apply:

(1) A vehicle shall be driven as nearly as practical entirely within a single lane and shall not be moved from the lane until the driver has first ascertained that movement can be made with safety;

(2) Official signs may be erected directing slower-moving traffic to use a designated lane or allocating specified lanes to traffic moving in the same direction, and drivers of vehicles shall obey the directions of every such sign.

27-51-303. Passing a vehicle proceeding in opposite direction.

Drivers of vehicles proceeding in opposite directions shall pass each other to the right. Upon roadways having width for not more than one (1) line of traffic in each direction, each driver shall give to the other at least one-half (½) of the main-traveled portion of the roadway as nearly as possible.

27-51-307. Restrictions on passing overtaken vehicle on left.

(a)(1) No vehicle shall be driven to the left side of the center of the roadway in overtaking and passing another vehicle proceeding in the same direction unless the left side is clearly visible and is free of oncoming traffic for a sufficient distance ahead to permit overtaking and passing to be completely made without interfering with the safe operation of any vehicle approaching from the opposite direction or any vehicle overtaken.

(2) In every event, the overtaking vehicle must return to the right-hand side of the roadway before coming within one hundred feet (100') of any vehicle approaching from the opposite direction.

(b) No vehicle shall, in overtaking and passing another vehicle or at any other time, except upon a one-way roadway, be driven to the left side of the roadway, under the following conditions:

(1) When approaching the crest of a grade or upon a curve in the highway where the driver's view along the highway is obstructed;

(2) When approaching within one hundred feet (100') of or traversing any intersection or railroad grade crossing;

(3) When the view is obstructed upon approaching within one hundred feet (100') of any bridge, viaduct, or tunnel;

(4) Where official signs are in place directing that traffic keep to the right, or a distinctive center line is marked, which distinctive lines also so direct traffic as declared in the sign manual adopted by the State Highway Commission.

27-51-308. Conditions when overtaking on right.

(a) The driver of a vehicle may overtake and pass upon the right of another vehicle only under the following conditions:

(1) When the vehicle overtaken is making or about to make a left turn;

(2) Upon a street or highway with unobstructed pavement not occupied by parked vehicles of sufficient width for two (2) or more lines of moving vehicles in each direction;

(3) Upon a one-way street or upon any roadway on which traffic is restricted to one (1) direction of movement where the roadway is free from obstructions and of sufficient width for two (2) or more lines of moving vehicles.

(b)(1) The driver of a vehicle may overtake and pass another vehicle upon the right only under conditions permitting this movement in safety.

(2) In no event shall this movement be made by driving off the pavement or main traveled portion of the roadway.

27-51-309. Center left-turn lanes.

(a) As used in this section, "center left-turn lane" means a center lane on any road or highway that is for the purpose of executing two-way left turns in either direction and that is so marked by signage or striping.

(b) (1) Center left-turn lanes shall be for the exclusive use of left-turning vehicles in either direction.

(2) Center left-turn lanes shall not be used for through travel, nor shall center left-turn lanes be used for passing or overtaking, except as a part of the left-turn maneuver.

(c) It is permissible for a vehicle making a left-hand turn from an intersecting street or driveway to utilize a center left-turn lane as part of the maneuver to gain access to or to merge into the traffic lanes, except that it is not permissible to use the center left-turn lane as an acceleration lane.

27-51-311. Overtaking a bicycle.

(a) The driver of a motor vehicle overtaking a bicycle proceeding in the same direction on a roadway shall exercise due care and pass to the left at a safe distance of not less than three (3) feet and shall not again drive to the right side of the roadway until safely clear of the overtaken bicycle.

(b)(1) A person who violates this section shall be subject to a fine not to exceed one hundred dollars (\$100).

(2) A person who violates this section with the violation resulting in a collision causing death or serious physical injury to the person operating the overtaken bicycle shall be subject to a fine not to exceed one thousand dollars (\$1000) in addition to any other penalties prescribed by law.

27-51-401. Turning at intersections.

The driver of a vehicle intending to turn at an intersection shall do so as follows:

(1) Both the approach for a right turn and a right turn shall be made as close as practical to the right-hand curb or edge of the roadway;

(2) The approach for a left turn shall be made in that portion of the right half of the roadway nearest the center line of the road. After entering the intersection, the left turn shall be made so as to leave the intersection to the right of the center line of the roadway being entered;

(3)(A) The approach for a left turn from a two-way street into a one-way street shall be made in that portion of the right one-half (1/2) of the roadway nearest the center line and by passing to the right of the center line where it enters the intersection.

(B) A left turn from a one-way street into a two-way street shall be made by passing to the right of the center line of the street being entered upon leaving the intersection.

27-51-402. Turning on curve or crest of grade prohibited.

No vehicle shall be turned so as to proceed in the opposite direction upon any curve, or upon the approach to, or near the crest of a grade, where the vehicle cannot be seen by the driver of any other vehicle approaching from either direction within five hundred feet (500').

27-51-403. Signals for turning, stopping, or decreasing speed required.

(a) No person shall turn a vehicle from a direct course upon a highway unless and until the movement can be made with reasonable safety and then only after giving a clearly audible signal by sounding the horn if any pedestrian may be affected by the movement or after giving an appropriate signal in the manner provided in subsection (b) of this section in the event any other vehicle may be affected by the movement.

(b) A signal of intention to turn right or left shall be given continuously during not less than the last one hundred feet (100') traveled by the vehicle before turning.

(c) No person shall stop or suddenly decrease the speed of a vehicle without first giving an appropriate signal in the manner provided in this subchapter to the driver of any vehicle immediately to the rear when there is opportunity to give such signal.

27-51-404. Signals to stop or turn.

(a) Any stop or turn signal when required in this subchapter shall be given either by means of the hand and arm or by signal lamps, except as otherwise provided in subsection (b) of this section.

(b) Any motor vehicle in use on a highway shall be equipped with, and the required signal shall be given by, signal lamps when the distance from the center of the top of the steering post to the left outside limit of the body, cab, or load of the motor vehicle exceeds twenty-four inches (24") or when the distance from the center of the top of the steering post to the rear limit of the body or load exceeds fourteen feet (14'). The latter measurement shall apply to any single vehicle and also to any combination of vehicles.

27-51-405. Hand and arm signals.

All signals required in this subchapter to be given by hand and arm shall be given from the left side of the vehicle in the following manner and these signals shall be indicated as follows:

- (1) Left turn — Hand and arm extended horizontally;
- (2) Right turn — Hand and arm extended upward;
- (3) Stop or decrease of speed — Hand and arm extended downward

(a) The driver of a vehicle approaching an intersection shall yield the right-of-way to a vehicle which has entered the intersection from a different highway. (Note: "First come, first served.")

(b) When two (2) vehicles enter an intersection from different highways at the same time, the driver of the vehicle on the left shall yield the right-of-way to the vehicle on the right.

(c) The foregoing rules are modified at through highways and otherwise as stated in this subchapter.

27-51-502. Vehicle turning left at intersection.

The driver of a vehicle within an intersection intending to turn to the left shall yield the right-of-way to all vehicles approaching from the opposite direction which are within the intersection or so close thereto as to constitute an immediate hazard. The driver, after having so yielded and having given a signal when and as required by this chapter, may make the left turn after all other vehicles approaching the intersection which constitute an immediate hazard shall

have cleared the intersection.

27-51-503. Vehicle or streetcar entering stop or yield intersection.

(a) Preferential right-of-way at an intersection may be indicated by stop signs or yield signs as authorized by law.

The driver having so yielded may proceed, and the drivers of all other vehicles approaching the intersection shall yield the right-of-way to the vehicle so proceeding.

(c)(1) The driver of a vehicle or the motorman of a streetcar approaching a yield sign shall, in obedience to such sign, slow down to a speed reasonable for the existing conditions, or shall stop if necessary as provided in § 27-51-601, and shall yield the right-of-way to any pedestrian legally crossing the roadway on which he is driving. The driver shall also yield to any vehicle in the intersection or approaching on another highway so closely as to constitute an immediate hazard. A driver having so yielded may proceed, and the drivers of all other vehicles approaching the intersection shall yield to the vehicle so proceeding.

(2) If a driver is involved in a collision with a pedestrian in a crosswalk or a vehicle in the intersection after driving past a yield sign without stopping, the collision shall be deemed prima facie evidence of his failure to yield right-of-way.

27-51-601. Stop signs and yield signs.

(a) Preferential right-of-way at an intersection may be indicated by stop signs or yield signs as authorized by law.

(b) Every stop sign and every yield sign shall be erected as near as practicable to the nearest line of the crosswalk on the near side of the intersection or, if there is no crosswalk, then as near as practicable to the nearest line of the intersection roadway.

(d) Except when directed to proceed by a police officer or traffic-control signal, every driver of a vehicle and every motorman of a streetcar approaching a stop intersection indicated by a stop sign shall stop before entering the crosswalk on the near side of the intersection. In the event there is no crosswalk, the driver or motorman shall stop at a clearly marked stop line, but if none, then at the point nearest the intersecting roadway where the driver has a view of approaching traffic on the intersecting roadway before entering the intersection.

(e) The driver of a vehicle approaching a yield sign, if required for safety to stop, shall stop before entering the crosswalk on the near side of the intersection. In the event there is no crosswalk, the driver shall stop at a clearly marked stop line, but if none, then at the point nearest the intersecting roadway where the driver has a view of approaching traffic on the intersecting roadway.

- (1) When so directed by a police officer;
- (2) When upon a one-way street; or
- (3) When upon a street where the tracks are so located as to prevent compliance with this section.

(b) The driver of any vehicle, when permitted to overtake and pass upon the left of a streetcar which has stopped for the purpose of receiving or discharging any passenger, shall reduce speed and may proceed only upon exercising due caution for pedestrians and shall accord pedestrians the right-of-way when required by other sections of this chapter.

The driver of a vehicle overtaking upon the right any streetcar stopped or about to stop for the purpose of receiving or discharging any passenger shall stop the vehicle at least five feet (5') to the rear of the nearest running board or door of the streetcar and thereupon remain standing until all passengers have boarded the car or, upon alighting, have reached a place of safety. However, where a safety zone has been established, a vehicle need not be brought to a stop before passing any streetcar but may proceed past such car at a speed not greater than is reasonable and proper and with due caution for the safety of pedestrians.

27-51-803. Driving on streetcar tracks.

(a) The driver of any vehicle proceeding upon any streetcar track in front of a streetcar upon a street shall remove the vehicle from the track as soon as practical after signal from the operator of the streetcar.

(b) If the bus is operated on multiple lane highways divided by a parkway or dividing strip of twenty feet (20') or more in width and if the bus is on the opposite side of the parkway or dividing strip, then the driver of the approaching vehicle need not stop but shall proceed with due caution for the safety of the passengers of the bus.

27-51-1204. Pedestrians crossing at other than crosswalks.

(d) (1) The commission, with respect to highways under its jurisdiction, may place signs prohibiting or restricting the stopping, standing, or parking of vehicles on any highway where in its opinion, as evidenced by resolution or order entered in its minutes, stopping, standing, or parking is dangerous to those using the highway or where the stopping, standing, or parking of vehicles would unduly interfere with the free movement of traffic thereon.

27-51-1302. Stopping, standing, or parking prohibited in specified places.

But vehicular traffic, including vehicles turning right or left, shall yield the right-of-way to other vehicles and to pedestrians lawfully within the intersection or an adjacent crosswalk at the time the signal is exhibited;

(B) Pedestrians facing the signal may proceed across the roadway within any marked or unmarked crosswalk;

(2) Steady yellow alone means:

(3) Steady red alone or "STOP" means:

(A) Vehicular traffic facing the signal shall stop before entering the crosswalk on the near side of the intersection or, if none, then before entering the intersection and shall remain standing until green or "GO" is shown alone, except that:

cautiously enter the intersection for the purpose of making a right turn only, unless there is a sign prohibiting the turn; and

(ii) Vehicular traffic in the left lane of a one-way street facing such signal, after coming to a complete stop, may cautiously enter the intersection for the purpose of making a left turn into the left lane of another one-way street only, unless there is a sign prohibiting such turn;

(B) No pedestrian facing the signal shall enter the roadway unless he can do so safely and without interfering with any vehicular traffic;

(4) Steady red with green arrow means:

(c) The motorman of any streetcar shall obey the signals as applicable to vehicles.

(d) Whenever special pedestrian-control signals exhibiting the words "WALK" or "WAIT" or "DON'T WALK" are in place, such signals shall indicate as follows:

Crash Prevention Steps

Traffic Skills 101

Step 1: Bike Control

Don't fall or collide with others

About half of cyclist crashes are single rider falls. If you can skillfully control your bike, by starting, stopping, signaling and maneuvering smoothly, you will avoid falling or running into other cyclists, dogs, cars and pedestrians.

Step 2: Follow Rules

Don't cause traffic crashes

For adult cyclists about half of the car/bike crashes are caused by cyclists who make unsafe decisions. Follow traffic laws, obey signs and signals and use correct lanes for turns and through movements so you don't cause a collision.

Step 3: Lane Positioning

Discourage other driver's mistakes

Motorist's unsafe decisions cause about half of the car/bike crashes for adult cyclists. Know when to control the lane or when to share a lane. Use your lane position to tell drivers what you are doing and discourage them from making right hooks, left crosses or other bad movements. Over 90% of the crashes can be avoided with the first three layers.

Step 4: Hazard Avoidance

Avoid other driver's mistakes

When all else fails and you are faced with a critical situation you need to understand how to maneuver your vehicle to avoid crashing or at least limit the consequence of a crash.

Step 5: Passive Safety

Protection to survive a crash

When all your skill and techniques fail and you are involved in a crash you need to have those passive safety devices that will help you survive. This means a helmet and gloves as a minimum. Think of these as the seat belt and air bags in your car.
